Arman Adhitama Prawirasasra

As a passionate Full Stack Developer, I bring extensive experience in designing and maintaining web applications across front-end and back-end environments. Proficient in modern technologies like HTML, CSS/Scss/Sass, JavaScript (Vue, Node.js), and Ruby (RoR), I excel at building dynamic, user-friendly, and scalable applications. With expertise in database management (SQL, MongoDB) and version control (Git), I ensure seamless integration, troubleshoot issues effectively, and deliver optimal user experiences.

I have hands-on experience in creating RESTful APIs, implementing authentication and authorization, and following Agile practices to deliver high-quality software. My familiarity with cloud platforms (AWS, Heroku) and containerization tools (Docker) enables me to build efficient and scalable solutions.

Motivated by challenges, I consistently strive to optimize solutions and enhance workflows. As a collaborative team player, I communicate effectively to align technical and business goals.

01. EDUCATION

1999 - 2002

High School
SMA Negeri 2 Bandung

Bandung

02. EMPLOYMENT HISTORY

May 2025 - present

Full Stack Engineer
Bicara Pintar AI
Bandung, Indonesia

Bicara Pintar AI is a technology company focused on building and implementing practical AI solutions for real-world operations. The company specializes in automation, data intelligence, and custom AI development tailored to business workflows.

Objectives

Developing KAI's internal finance application, including improving existing features and building new functionality to support operational efficiency.

Stack & Tools

Laravel, MySQL, Google Vertex, Git

Mar 2025 - May 2025

Fullstack Web Developer
Tokhimo Inc.
Tokyo, Japan (remote)

Tokhimo Inc. connects Japanese businesses with multilingual talent and offers offshore software development. Through job portals, internships, and TITP, they promote diversity and innovation for Japan's global success.

Objectives

Develop e-commerce for selling instant drinks where customer can create their own flavors (and sell them as well). The site is Choicetuch.

Stack & Tools

Ruby on Rails, Stimulus, PostgreSQL, Bootstrap (Sass), Stripe, Ubuntu Server, Git, Figma

Mar 2024 - Oct 2024

Frontend Developer
INOA
Brussels, Belgium (remote)

INOA is a technology firm specializing in branding, marketing, design, development, and project management. They support startups and scaling ventures in industries like AI, cryptocurrency, VR, and smart construction, driving growth with innovative solutions.

Objectives

Convert Figma designs into functional React components and responsive user interfaces, and transformed Figma layouts into precise Webflow projects. Additionally, I contributed to a backend web scraping project for customer data verification from European sources.

Stack & Tools

React JS, Tailwind, Webflow, GSAP, Monday.com, Figma

Feb 2022 - Feb 2024

Fullstack Web Developer
Tokhimo Inc.

Tokyo, Japan (remote)

Tokhimo Inc. connects Japanese businesses with multilingual talent and offers offshore software development. Through job portals, internships, and TITP, they promote diversity and innovation for Japan's global success.

Objectives

Develop the MVP for Patient Success, a cloud-based CRM (SaaS) by WishHealth Co., Ltd., a digital patient engagement specialist in Japan. Responsibilities included building core platform features, integrating third-party services such as LINE messaging and Stripe, and managing AWS infrastructure for scalability and reliability.

Stack & Tools

Ruby on Rails, PostgreSQL, Bulma (Sass), VueJS, Stripe, LINE LIFF, Docker, AWS (Route 53, S3, Lightsail, RDS, EC2, SES, ACM, ECS, Fargate), Git, Jira, Figma

Jan 2020 - Jan 2022

Software Development Lead
Synergy Engineering Group

South Tangerang, Indonesia (hybrid)

Synergy Engineering is a multidisciplinary engineering consultant with specialist capability providing comprehensive technical services across industries, primarily to the energy sector including Oil and Gas, renewable energy, solar, and general industry.

Objectives

Develop the Synergy Business Suite (SBS), a toolset for managing HR and CRM activities at Synergy Group. This involved collaborating with various departments to gather requirements and translate them into efficient web-based workflows.

Achievements

I developed an online attendance system, used by over 300 employees since the onset of Covid-19, replacing the outdated fingerprint scan system with an Active Directory-integrated solution. Additionally, I created a web-based tool for safety and process engineers to calculate and analyze fire and explosion risks.

Some of my works or works under my supervision incl:

1. https://sbs.synergyengineering.com; **Stack & Tools:**Ruby on Rails, Slim, Bootstrap (Sass), Microsoft Active Directory, PostgreSQL, MongoDB, Git, Ubuntu Server, Trello
2. Document Management System for Pertamina Hulu Energi Offshore Southeast Sumatra (PHE OSES); **Stack & Tools:**Laravel, MySQL, Git, Ubuntu Server. Trello
3. Technical Management of Change system for Pertamina Hulu Energi Offshore Southeast Sumatra (PHE OSES). **Stack & Tools:**Symfony, MySQL, Git, Ubuntu Server, Trello

Jun 2019 - Jan 2020

Frontend Developer
sejasa.com

Bandung, Indonesia (on-site)

sejasa.com is an online marketplace that brings together various service providers such as construction and cleaning services with customers. Sejasa is part of Recommend Group Malaysia which operates in Malaysia (recommend.my) and Thailand (helpdee.com) as well.

Objectives

Collaborate with a UI/UX designer to implement designs into Ruby on Rails pages, enabling seamless integration for functionality by other developers. Resolve frontend issues in existing web and app pages to enhance user experience.

Achievements

Create an embedded mobile application inside Grab Super App (if you're using Grab app, you can see through **Clean & Fix** menu).

Stack & Tools

Ruby On Rails, Haml, Bootstrap (Sass), jQuery Mobile, Git

Jan 2017 - May 2019

Lead Developer
Kopihub

Bandung, Indonesia (hybrid)

KopiHub is a subsidiary of Lipsia Group (lipsiagroup.com), a small Milan-based company offering services like website development and e-commerce outsourcing to its clients.

Objectives

Maintain and enhance Lipsia's e-commerce engine while leading the development team in building and managing client's e-commerce websites, including occasional redesigns. Also handled server configuration, maintenance, and migration tasks.

8. https://www.santaninfabags.it

Stack & Tools

Ruby on Rails, Git, Haml, Slim, Bootstrap (Sass), jQuery, Ubuntu Server, PayPal

Jan 2015 - Feb 2016

Fullstack Developer
PT. Tennova Cipta Inatech

Jakarta, Indonesia (hybrid)

Tennova Cipta Inatech is a digital startup company behind Gesek, which later became Pomona.

Objectives

Implement designs from the UI/UX designer into fully functional websites and CMS using Ruby on Rails. Develop RESTful APIs and managed cloud servers on AWS, ensuring optimal performance and reliability.

Stack & Tools

Ruby on Rails, Slim, Bootstrap (CSS), MySQL, Elasticsearch, AWS (EC2, RDS), Git, Grape API

Jun 2014 - Jan 2015

Ruby on Rails Developer
Codecampz

Tangerang, Indonesia (on-site)

Codecampz is a web development agency, specializing in Ruby on Rails application development.

Objectives

Create and implement UI/UX designs while coding both frontend and backend functionalities to deliver complete and functional solutions.

Stack & Tools

Photoshop, Ruby on Rails, ERB, Haml, Scss, Bootstrap (Scss & CSS), jQuery, Angular, rSpec, MySQL, PostgreSQL, MongoDB, Heroku, Ubuntu Server, Pivotal Tracker, Git

Dec 2011 - Feb 2014

UI/UX Designer & Frontend Developer
PT. Jaya Sportindo

Bekasi, Indonesia (on-site)

Jaya Sportindo is an authorized distributor of Ultimate Nutrition and various sporting goods for the fitness market across Indonesia since 2009. Owned by Denny Santoso, Jaya Sportindo tried their luck in the digital startup world by creating SixReps, social media for fitness enthusiasts, and later on Beautiplan, social media for beauticians.

Objectives

Design UI/UX interfaces using Adobe Photoshop and convert them into fully functional HTML pages for sixreps.com and beautiplan.com.

Stack & Tools

Photoshop, HTML, Bootstrap (CSS), jQuery, traditional kanban, Git

Jun 2010 - Nov 2011

Fullstack Developer
GoLive! Mobile

Boston, USA (remote)

Golive! Mobile is a mobile content company that is ranked #1 fastest growing media company on the 2011 ***Inc500*** list. One of the company's products is AirPush, a mobile advertising platform.

Objectives

Convert PSD design files into responsive HTML layouts, ensuring cross-device compatibility. Additionally, I developed a custom CMS for AirPush, a native Android ad platform.

Stack & Tools

HTML, CSS, CodeIgniter, WordPress, jQuery, MySQL

Jun 2008 - Jul 2010

Frontend Developer

PT. Walden Global Services

Bandung, Indonesia (on-site)

WGS is a software development agency in Bandung with various clients across the globe.

Objectives

Develop frontends for client projects by converting PSD/mockups into HTML, WordPress themes, or Ruby on Rails applications. Built simple CMS solutions using CodeIgniter and MySQL for efficient content management. Additionally, provided internal mentorship on frontend development to improve team skills and expertise.

Stack & Tools

HTML, CSS, CodeIgniter, Ruby on Rails, Javascript, SVN, WordPress, MySQL

Oct 2007 - May 2008

UI/UX & Frontend Developer

PT. MANDIRI CReASINDO

Jakarta, Indonesia (on-site)

PT. MANDIRI CReASINDO was founded in 2005 as a software development company based on its customers' needs. The clients mostly are government institutions.

Objectives

Design user interface and translate it into working code on various web-based closed systems and public websites for the clients.

Stack & Tools

HTML, CSS, Zend PHP

03. OTHER PROJECTS
